3.

Please follow our detailed measuring instructions.

▶ [PAGE 2](#)

4.

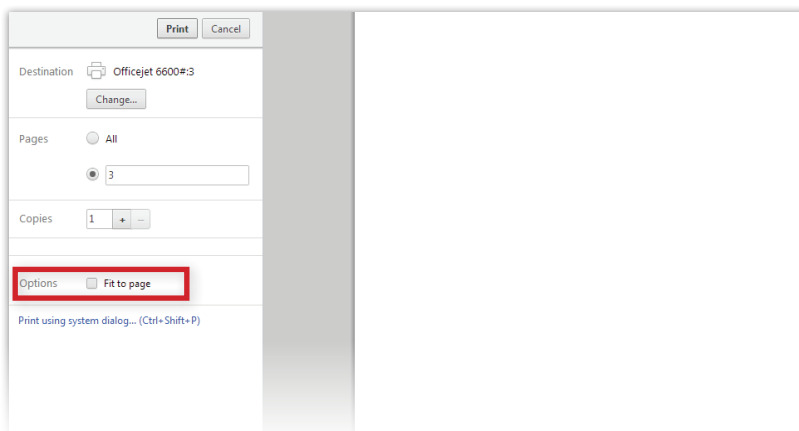

Find your optimal shoe size!

1. Choose a print option

Method 1

Printing with Chrome

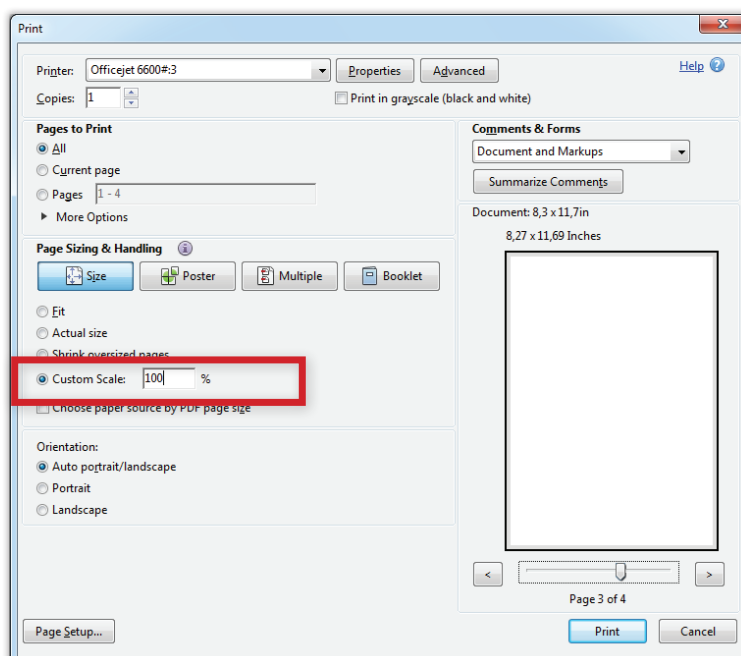

OR

Method 2

Printing with Acrobat Reader

1. Decide first whether you want to measure your right or your left foot (page 3 or 4). Unsure about which foot you should choose? We recommend measuring both feet – the bigger one will serve as a benchmark.

2. Fold the lower right edge of the measure paper at the marked position or, if you prefer, cut it off completely.

3. In order to achieve accurate results align the paper to a straight wall or a doorframe.

ADVICE

During the day your shoe size can sometimes differ because feet can swell up. It is possible that you will have a different size in the morning than in the evening. Please measure your feet in the afternoon.

4. Place your foot on the measure paper. Please note, that your heel should touch the red line, while your foot's inner side should follow precisely the vertical line of your foot length.

ADVICE

Socks of different thicknesses can influence the result. Please put on a pair of socks that you will also wear with your new Goodyear-welted shoes.

5. Mark the highest point of your foot with a pencil as well as the ball of your smallest toe.

ADVICE

You can perform this measuring by yourself. To avoid any measuring errors though, it can be helpful to use the assistance of another person. In case you have nobody on hand, please be sure not to move your foot whilst you are marking the toe.

6. After you have removed your foot from the paper, you can conveniently look up your correct SHOEPASSION.com size. If the ball of your small toe reaches further than the maximum mark of your shoe size, please choose a model on an extra-wide shoe last.

ADVICE

If your mark is between two shoe sizes, please choose the higher size. If you have two different sized feet, again, please order the bigger shoe size.

31,2 cm | 13
 30,8 cm | 12,5
 30,3 cm | 12
 29,8 cm | 11,5
